

Dear Hiring Manager,

I am writing to express my interest in the *Senior ODI ETL & OAS BI Banking Data Developer* role at National Bank of Egypt (UK) Ltd. With over 10 years of experience in Oracle-based development, data integration, and reporting within the banking and life sciences domains, I am confident my skills align well with the requirements of this role.

In my recent position as a **Senior Oracle Developer at The Access Bank UK**, I have:

- Designed and implemented **data models and ER diagrams** tailored to banking applications including Oracle FLEXCUBE.
- Developed and optimised **PL/SQL scripts**, including ETL logic and job schedulers for data synchronisation and reporting.
- Built complex dashboards using **SAP Business Objects**, XML templates, and APEX faceted reports for regulatory and business insight.
- Automated Visa Net Settlement TC46 files to convert raw transaction data into structured, analysable formats within Oracle.

Earlier in my career, I led APEX-BI Publisher integration as a **Freelance Oracle Consultant**, developing a billing system (e-Smart Bill) where I managed template design, data extraction, and performance tuning—closely echoing the OAS BI development aspects of your role.

I am particularly drawn to this opportunity because of its focus on **data warehousing, ETL using ODI, and BI development with OAS**—areas where I'm eager to bring my expertise and further grow.

I've attached my CV for your review. I am based in Northwich, hold a UK-dependent visa with full right to work and ready to relocate to London. Additionally I wanted to update that my Visa has been now extended to February 2028, which I hope makes the hiring process more seamless. I would be happy to discuss how I can contribute to your team and the bank's data goals.

Thank you for considering my application. I look forward to the opportunity to speak with you.

Warm regards,
Sweekruti Bhagwani
